

YANKEE WAREHOUSE

PRESTONE Driveway Heat

Nothing de-ices driveways, walkways, and steps faster or at lower temperatures. Driveway Heat is a concentrate, not a blend of ineffective de-icers. The PRESTONE bag melts more ice than 200 lbs. of rock salt (at 5 degrees Fahrenheit). Don't be fooled by imitators.....Driveway Heat ice melter is the concentrated real thing.

HOW IT WORKS

Driveway Heat ice melter produces an exothermic reaction as it works, giving off heat. The heat enables the product to work down to negative 25 degrees Fahrenheit. Other ice melters lose effectiveness at 20 degrees Fahrenheit.

ADVANTAGES

- Melts to a clear solution, leaving behind no white powdery residue.
- Used as directed, PRESTONE Driveway Heat will not harm vegetation.
- Works down to -25 degrees Fahrenheit.

De-Icing Salt: Good

Rock Salt

Road Runner: Better
